

Project:

*Foamex International, LP
Auburn, Indiana*

Seeking to expand the production and storage of foam products, Foamex International, LP selected Irmscher, Inc. to construct a foam bunn room addition to the existing facility in Auburn, Indiana. Irmscher, Inc. provided alternative structural solutions to span 220-ft. wide, supporting a 220-ft. wide top running crane. These value analysis services, along with creating project phasing allowed Foamex International, LP to manage their capital budget, still completing their project in an efficient and expedient fashion.

The completed 78,620-sq. ft. addition now accommodates additional foam products, allowing Foamex to increase product distribution, reduce production cost, and ship larger quantities to individual customers.
