

Project:
*Retail Outlet Mall
Daleville, Indiana*

Irmscher, Inc. was employed as the General Contractor for this new 230,917 square foot retail outlet mall facility due to our established reputation of meeting stringent project schedules. The project was completed, as scheduled, within five (5) months.

This new four-building retail outlet mall was constructed using the site-cast, tilt-up concrete wall construction method. This facility included eighty (80) different retailers, in addition to a food court and outdoor playground facility. All buildings are connected by covered walkways.

Upon completion of the project, Irmscher, Inc. was awarded the “1994 Outstanding Achievement Award” presented by Indiana Ready Mixed Concrete Association in recognition of outstanding concrete construction in commercial structures.
