

**Project:**  
*Medical Office Building  
Port Huron, Michigan*

Driven by the need for a highly organized construction and scheduling process, Orthopedic Associates of Port Huron selected the Irmischer/Marasco Team to design and construct a new 29,000-sq. ft. medical center.

Irmischer/Marasco's national experience provided the Orthopedic Associates with confidence that the finished product would be operationally state-of-the-art, efficient, and competitively priced.

The uniquely designed structure reflects a nautical theme inspired by the serene environment of nearby Lake Huron. Completed in Summer 2001, the finished structure accommodates a multi-surgeon orthopedic practice, physical therapy center and medical office building.
